

El Paso Eyeworks

Doctors of Optometry

For **insurance** patients only, a contact lens fitting fee is a fee that is not considered part of the routine eye exam and is due at the time of service. If the fee is not established by the insurance our fee is \$60.00 and is not refundable. We are more than happy to discuss the price up front with any patient. This is a separate charge to the exam co-pay.

For **non insurance** patients this fee is included with the contact lens eye exam for the price of \$120.00, \$140.00, or \$180.00.

The contact fit enables the doctor to fit them with a pair of trial contact lenses. This allows the doctor to see how the patient reacts to the contact lenses and also to determine if the contact lenses fit properly. In order to complete the fitting process, most patients may require a contact lens follow-up. This occurs within 1-2 weeks from the time of the initial exam.

At the follow-up exam the doctor may feel the need an adjustment to a patients' trial lens power, curvature, size or brand. There will not be an additional charge for subsequent trial lenses when the doctor deems a change is necessary.

However, if the patient loses, damages or tears their trial lenses, they will be responsible for replacement at the designated price of \$10.00. If a patient does not return within thirty (30) days of their initial exam for their follow-up, they will be charged for an office visit of \$35.00 to evaluate the fit of their trial contact lenses. **It is the patients responsibility to inform us if any changes, cancellations, or missed appointments.**

If you have any questions regarding this policy ask a staff member. Most insurances only cover either glasses or contacts, **not both**. Please let us know if you would like the insurance to cover you for contacts and will purchase contacts through our office.
